KAMATA TOSHIO**(54) BLANKET FOR PRINTING****(57) Abstract:**

PROBLEM TO BE SOLVED: To provide a blanket for printing in which both of solid forming property and the reproducing property of a printing image are provided, and which can provide a high-quality printing image even in high-speed printing.

SOLUTION: The blanket 10 is provided with a surface printing layer 11, a reinforcing layer 13 and a compressive layer 14 in this sequence. A reinforcing fabric 130 constituting the reinforcing layer 13 is specified so as to have 20-200 N/cm of a load required to obtain 2% of elongation in the printing direction of the blanket for printing and 200-450 N/cm² of compressing stress E_c when the fabric is compressed so as to have the whole thickness to of 0.19 mm.
